

# Hardcoated and Perfectly Clear

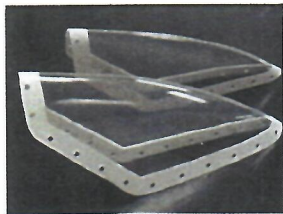

**CUPERY CORPORATION d/b/a AIRCRAFT WINDOW REPAIRS (AWR) IS A CERTIFIED FAA/EASA, PART 145 REPAIR STATION. LOCATED IN TORRANCE, CALIFORNIA. AWR OVERHAULS, REPAIRS AND REBUILDS AIRCRAFT TRANSPARENCIES FOR OVER 50 TYPES OF CORPORATE AIRCRAFT.**

Bob Cupery was previously employed by Northrop Corporation as Director of Maintenance and Flight Engineer under the pilot who flew Air Force One where everything had to be adamantly perfect. As a result of his career with Northrop, precision and high quality had become a way of life for him and this is the principle philosophy of AWR.

Robert R. Cupery  
Founder/CFO

At the request of Dassault Falcon Jet, Bob developed AWR's FAA-approved Process Specification CC-103, AWR# 8000 Polycarbonate Hard Coat, for maintenance and preventive maintenance on landing light and wingtip lenses. With the development of AWR# 8000 XL for acrylic lenses, the customer list has expanded to include Gulfstream, Raytheon and Boeing.

FALCON LENS

GULFSTREAM LENS

Bob Alvarez, "the other Bob" at Aircraft Window Repairs, and Bob Cupery conduct FAA-approved training seminars on the transparencies for IA renewal, pilots and aircraft owners. Lecturing on transparencies has taken them from Hawaii to Europe, from Seattle to San Diego. Bob Alvarez takes pride in his contributions to product development and improving the methods used at Aircraft Window Repairs today. Quality Management has taken him from the city library to the FAA Academy in Oklahoma City.

Robert Alvarez Jr.  
Quality Manager/  
Chief Inspector
